

# K-12 Testing Program

By Orion Laboratories

## Welcome to the K-12 Testing Program in partnership with the Louisiana Department of Health and the Department of Education

We build testing programs to meet each school's unique needs and provide additional support throughout the school year. Our team manages the entire process from collection to lab testing to reporting, so you'll have test results before the following school day.

### Designed by educators specifically for school settings

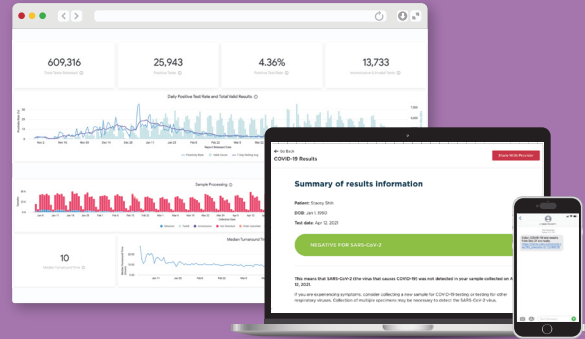

*The K-12 Testing Program was developed to support school superintendents and principals by leveraging federal government resources to prevent the repeated cycles of reopenings, outbreaks, and closures.*

-  Proven method to prevent outbreaks
-  Results available by the next morning
-  Trained staff provide on-site collection
-  Available to students, faculty, and staff
-  Oral or nasal swabs that are short and easy
-  PCR technology, the most accurate available
-  Information is private, secure, and confidential
-  No cost to schools, districts, or parents
-  Ad-hoc testing for symptomatic individuals
-  Easy-to-understand results via text or email
-  Weekly scheduled time to minimize disruption

# Stay a Step Ahead

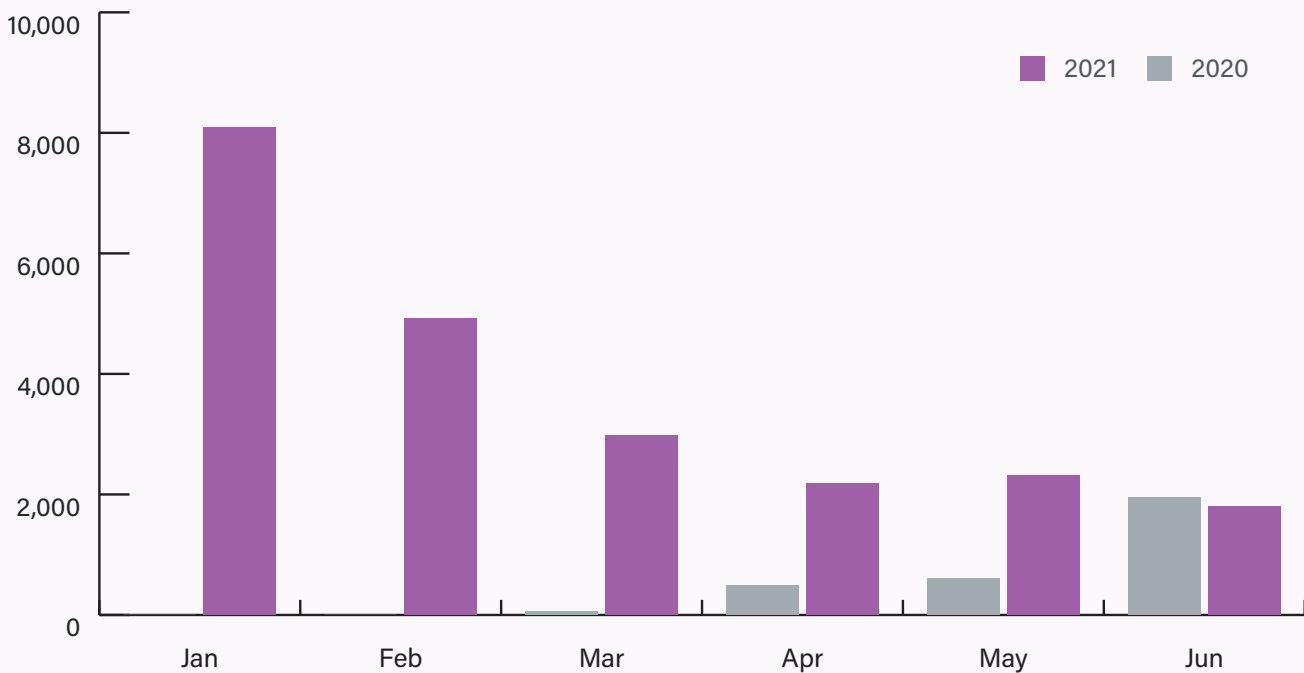

*Prevent any outbreaks before they occur*

Results are available via text or email by the next morning for families, students, and teachers. We also provide access to two real-time dashboards to let you manage the testing of your students and staff.

## Louisiana's new COVID-19 cases for population ages 0-17 years

Positive cases for our student population are significantly higher than last year and the removal of mask requirements combined with new variants makes it critical to monitor and detect cases in your school's community.

K-12 Testing Program for COVID-19 is powered by Orion Laboratories, a CLIA certified high-complexity laboratory in Baton Rouge, Louisiana.
